

DOIT MASTER AGREEMENT NUMBER:

B-03-013

DOIT APPROVAL DATE:

8/1/2005**VENDOR NAME: MCI WORLDCOM Communications, Inc.****FEIN: 47-0751768****SERVICE/PRODUCT NAME: Local Exchange Service: Analog Trunks (Provisioned over T1)****SERVICE/PRODUCT DESCRIPTION:**

MCI is one of the nations largest Competitive Local Exchange Carriers (CLECs). It owns and operates fiber optic networks and local switching systems to deliver Local Service in the greater Hartford and Stamford areas (see Service Availability tables for specific coverage areas). Local service includes:

- 911/E911
- Directory listing
- Directory assistance
- Operator and customer services (7x24x365)
- Telephone number assignment
- Service access codes (800/888 and 700 numbers)
- Telecommunications Relay Services
- Equal access (1+ dialing)
- Local number portability
- Phone books

Local Trunk Service provides Analog Trunks and Digital Trunks that connect the Class 5 Local Office with the subscriber's PBX or Key system. All include Touch Tone and Hunting. DID numbers can be ordered in blocks of 20 or 100.

- **Local Trunk Basic:** available for digital or analog trunks; can carry inbound, outbound or two way traffic.
- **DID Trunks:** DID-capable trunks are configured to out-pulse two to seven digits to your company's PBX to route an incoming call directly to an individual station without the intervention of a live or automated attendant.
- **Two-Way DID Trunks:** Two-way DID offers direct inward dialing capability with the added functionality of placing outbound calls on the same trunks.
- The following trunk types are available:
 - One-way inbound for inbound calls
 - One-way outbound for outbound calls
 - Two-way for inbound and outbound calls

Telecommunications Service Priority (TSP) – TSP is a federally-established program under which the Office of Priority Telecommunications in the Executive Office of the President prioritizes the restoration and provisioning of telecommunications services – including services to states, private companies and institutions -- that support national security or emergency preparedness (NS/EP). TSP services are in two categories: Priority Provisioning (including Emergency Provisioning and Essential Provisioning) and Priority Restoration. Note a customer may subscribe to either Emergency Provisioning or Essential Provisioning for a circuit, but may not subscribe to both.

1. Emergency Provisioning is provided by MCI in response to an emergency, when the Customer's need for a service is critical and must be provisioned at the earliest possible time, without regard to the cost to the Customer. In Emergency Provisioning MCI will take immediate action to allocate the resources necessary to provision circuit(s) and any related special construction assigned an Emergency Provisioning priority level as soon as possible, including dispatching personnel outside normal MCI business hours.

2. Essential Provisioning is provided for new essential NS/EP service that must be installed by a specific date that cannot be met using normal MCI business procedures. In Essential Provisioning, MCI will adjust its resources to make its best effort to provision the circuit(s) and any related special construction assigned an Essential Provisioning priority level, by the requested service due date, based on the priority level assigned.
3. Priority Restoration designation establishes priorities for restoring NS/EP service in the event of an outage or failure of multiple services. MCI will dispatch personnel outside normal business hours if necessary to restore circuit(s) (and provide any related special construction) assigned a Priority Restoration level of 1, 2, or 3. MCI will dispatch personnel outside normal business hours to restore circuits (and provide any related special construction) assigned a Priority Restoration level of 4 or 5 only when the next business day is more than 24 hours away.

TSP services are available on any circuit type: PRI, T1, Analog, Internet Dedicated, Frame, ATM, Private Line, etc.

State and Local agencies can get sponsorship for TSP from the National Communications System at <http://tsp.ncs.gov>.

SERVICE LEVELS: MCI does not offer SLAs for local service; TSP coverage will improve repair times. The following repair statistics for Local service apply.

Mean Time to Repair (MTTR)

- Priority 1: 4 hours
- Priority 2: 8 hours
- Priority 3: 12 hours
- Priority 4: 24 hours

SERVICE AVAILABILITY/LIMITATIONS:

See Services Availability table
